
到 C:\Users{當前用戶名}\AppData\Local\Atlassian\SourceTree\ 這個路徑

下新建 accounts.json ，並複製如下代碼到 json 檔：

```
[
  {
    "$id": "1",
    "$type": "SourceTree.Api.Host.Identity.Model.IdentityAccount,
SourceTree.Api.Host.Identity",
    "Authenticate": true,
    "HostInstance": {
      "$id": "2",
      "$type": "SourceTree.Host.Atlassianaccount.AtlassianAccountInstance,
SourceTree.Host.AtlassianAccount",
      "Host": {
        "$id": "3",
        "$type": "SourceTree.Host.Atlassianaccount.AtlassianAccountHost,
SourceTree.Host.AtlassianAccount",
        "Id": "atlassian account"
      },
      "BaseUrl": "https://id.atlassian.com/"
    },
    "Credentials": {
      "$id": "4",
      "$type": "SourceTree.Model.BasicAuthCredentials, SourceTree.Api.Account",
      "Username": "",
      "Email": null
    },
    "IsDefault": false
  }
]
```

.....

打開 C:\Users{當前用戶

名}\AppData\Local\Atlassian\SourceTree.exe_Url_25t1xs10bzzlo5mj0lqp

e3o52byurph\3.3.8.3848\下的 user.config 檔，增加如下代碼：

.....

```
<setting name="AgreedToEULA" serializeAs="String">  
    <value>True</value>  
</setting>  
<setting name="AgreedToEULAVersion" serializeAs="String">  
    <value>20160201</value>  
</setting>
```
